## Solving Word Problems I Addition and Subtraction

Let's Learn!

### Word problems

- 1** Omar and Ella were selling raffle tickets. Omar sold 3450 tickets and Ella sold 1286 fewer tickets than Omar.
- a** How many tickets did Ella sell?
  - b** How many tickets did they sell altogether?

- a**  $3450 - 1286 = 2164$   
Ella sold 2164 raffle tickets.

- b**  $3450 + 2164 = 5614$   
Omar and Ella sold 5614 raffle tickets altogether.

# A bar model

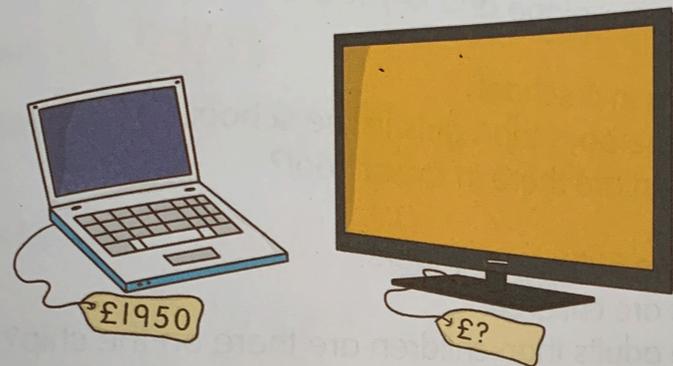

---

- A bar model is a diagram to support our understanding of whether to add/subtract/multiply or divide for word problems. It allows us to visually see the parts or the whole of a number sentence.

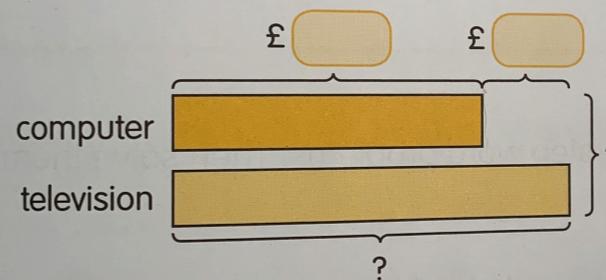

Use the bar model to solve this:

---

- 2 A computer costs £1950.  
The computer costs £250 less than the television.  
How much do both items cost altogether?

Find out the cost of the television first!

£   £  = £

The television costs £ .

£   £  = £

Both items cost £  altogether.

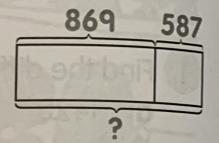

Ask your child to make up three subtraction word problems using the following concepts: part-whole, taking away and comparing.

# Now let's continue with our word problems within 10 000

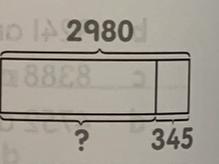

- a 3840      b 3940  
c 5060      d 5160

6 A farmer sells 869 eggs on Monday. He sells 587 more eggs on Tuesday than on Monday. How many eggs does he sell on Tuesday?

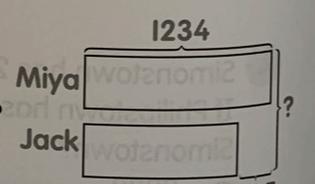

- a 282      b 322  
c 1346      d 1456

7 Kerry saves £2980. Ravi saves £345 less than Kerry. How much money does Ravi save?

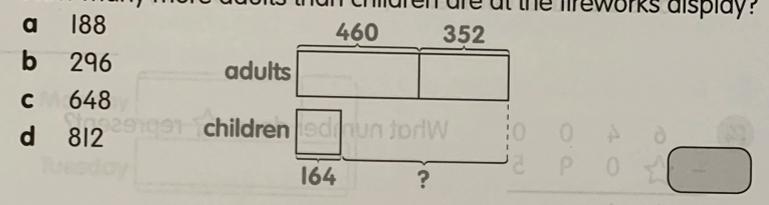

- a £2325  
b £2635  
c £2645  
d £3325

8 Miya has 1234 photos in her album. Jack has 345 fewer photos in his album. How many photos do they have altogether?

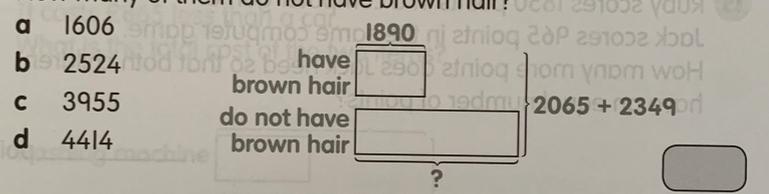

- a 889  
b 1234

9 There are 460 men, 352 women and 164 children at a fireworks display. How many more adults than children are at the fireworks display?

- a 188  
b 296  
c 648  
d 812

10 There are 2065 girls and 2349 boys at a concert. 1890 of the children have brown hair. How many of them do not have brown hair?

- a 1606  
b 2524  
c 3955  
d 4414

Marks out of 20  
(10 × 2 = 20 marks)

## Section B

Write the correct answer in the space.

- 11  $1000 - \underline{\hspace{2cm}} = 88 - 33$
- 12 What must be added to 2859 to get 4000?
